

Aixe-en-Othe - wastewater treatment plant discharges

Impact assessment

Country

France

Client

Commune d'Aixe-en-Othe

Date

2007-2009

Sogreah's services

- ▶ Baseline assessment, analysis of industrial sites
- ▶ Impacts of the plant on the natural aquatic environment
- ▶ Measurements on the natural environment, dye tracing in the receiving water body
- ▶ Mitigating measures

Context

The town of Aixe-en-Othe has a wastewater treatment plant using the activated sludge with prolonged aeration technique, with a capacity of 3000 PE.

The services provided consist in assessing the impact of discharges from the plant on the receiving water body, the river Nosle.

This document forms part of the statutory declaration that the owner must draw up according to current French legislation.
