SEMITAN

Date: 2000-2004

Cost of works:
€21m exc. VAT
Sogreah /Systra / Forma 6 / Phytolab

Assignments and amounts:
- Design services and project supervision
**including management of the networks
coordination unit**

Share for Sogreah Consultants: €1.48m

Description of the project:

Road infrastructure and tramway equipment for the extension of line 3 north of Nantes tramway (2.2 km).

Main characteristics of the project included in the design services and project supervision contract:

- ◆ 2.2 km tramway track bed including track.
- ◆ Roadway development related to the urban integration of the project.
- ◆ Development of four standard stations and a bus-tram feeder centre.
- ◆ Creation of 2 park-and-ride car parks.
- ◆ Installation of luminous signs giving right of way to trams.
- ◆ Creation of a fountain crossed by the tramway.
- ◆ Retaining structure and road underpass approach with clipped granite finish.
- ◆ Installation of lighting along all roads and tramway track bed, with design of specific lighting masts for large open spaces and integration of lamps on overhead tram power lines.
