Communauté Urbaine de Nantes

Owner's representative:
SEMITAN

Date: 2003-2007

Cost of works:
€35m exc VAT

Assignments and amounts:
- Design services and project supervision
**including participation in the networks
coordination unit**

Share for Sogreah Consultants: €1.46m

Description of the project: Infrastructure and civil engineering works to create a complete right of way for specific rolling stock on tyres with contactless guidance

Main characteristics of the project:

- ◆ Road track bed for the right-of-way system running about 7 km
- ◆ Road development related to the urban integration of the project
- ◆ Redevelopment of an expressway (A801) as an urban boulevard
- ◆ Construction of the new 75 m long Carnot bridge crossing the railways in Nantes city centre
- ◆ Widening of existing bridges
- ◆ Development of 15 stations with raised platforms
- ◆ Creation of a bus interchange
- ◆ Creation of 4 park-and-ride car parks offering about 1000 spaces
- ◆ Installation of luminous signs giving right of way to public transport
- ◆ Low voltage equipment in the stations and optical fibre links
