

ENERGY ASSESSMENT FOR 61 PUBLIC BUILDINGS AND RENEWAL OF THE HEATING SYSTEMS CONTRACT VERTOU (FRANCE)

Owner:
Ville de Vertou

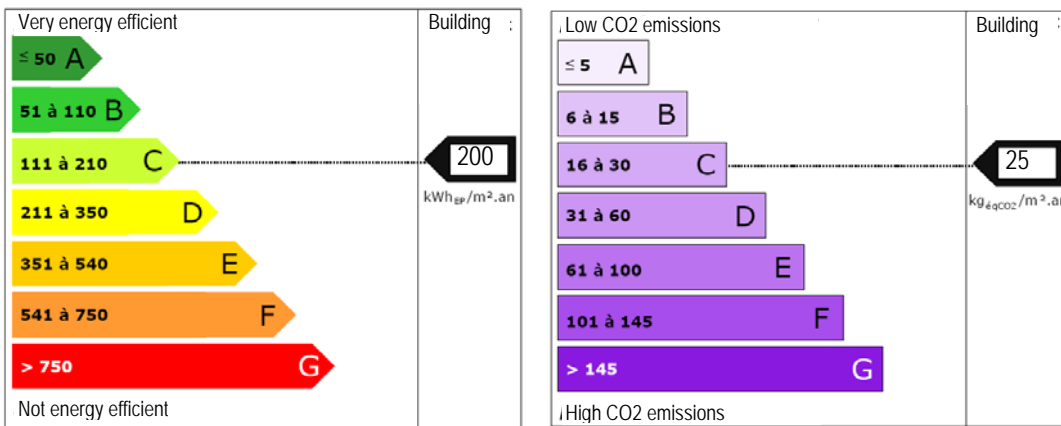

Date: 2008-2009

Assignments and amounts:

- Assessment
- Assistance with the contract renewal procedure
- Cost of works: €58,000 excl. VAT

Composition of the team:

- SOGREAH Consultants (leading partner)
- CAP INGELEC (co-contractor)

Description of the project:

- Energy assessment for 61 public buildings
- Improvement recommendations (construction, equipment, management, renewable energy, awareness raising, etc.)
- Assistance with the contract renewal procedure for heating, air-conditioning, domestic hot water and extraction systems.

Main characteristics of the project:

- On-site assessment of 61 public buildings: offices, schools, gymnasiums, libraries, cemeteries, etc.
- Assessment of performance levels: energy consumption and CO₂ emissions
- Drawing up of energy diagnosis reports
- Identification of the buildings' current condition (insulation, door and window frames, etc.)
- Detailed inventory of existing systems
- Improvement recommendations including information on works cost estimates, energy savings, financial savings, avoided CO₂ emissions, works cost benefit analysis and priorities.
- Defining of the tendering strategy for the setting up of the future heating systems operation contract.
- Assistance with the contract renewal procedure: drafting of tender documents, bid assessment, etc.
