

Renault Dealerships Europe Multi-site Environmental Audits

Countries

United Kingdom, Germany, Austria, Belgium, Czech Republic

Client

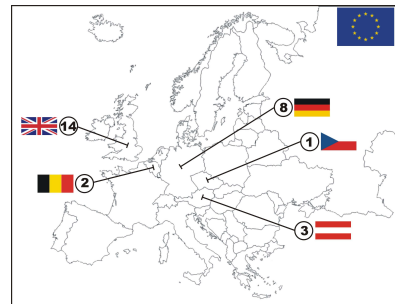

Renault Retail Group

Date

2008

Sogreah Magelis' Services

- ▶ Environmental Audits: 28 sites
- ▶ Environmental Recommendations

Renault Retail Group (RRG) wanted to have environmental audits of all its dealerships in Europe.

The approach developed by Sogreah Magelis was designed to meet the deadline of the client (completion of all audits and budget of investigations by the end of 2008) and ensure consistency throughout the project incorporating requirements and specificities of each local regulation.

To answer to client request, Sogreah Magelis managed a European team of auditors to cover all countries by local experts familiar with both local regulations and international standards for environmental audits.

These audits have resulted in recommendations for compliance with the regulation but also in best environmental practices.

Renault Retail Group (RRG) achieves its objectives to clarify its environmental liabilities.
