

# Dabrowa Gornicza – Industrial Waste Incinerator Environmental Due Diligence Audit

## Country

Poland

## Client

SARP Industries

## Date

2004

## Sogreah Magelis' services

- ▶ Review of environmental and historical data
- ▶ Site visit, site assessment and recommendations on further site characterization
- ▶ Site investigation to determine groundwater and soil quality of the site
- ▶ Identification of non compliance and environmental issues
- ▶ Contractual recommendations for the acquisition of the industrial site

Sogreah Magelis assisted SARP industries in the characterization and assessment of environmental issues and liabilities associated with the acquisition of an industrial waste incinerator site.

The Due Diligence Audit was performed following industrial best practices and in compliance with Polish and European regulations.

The Audit consisted of a preliminary phase comprising data collection, review of former and existing activities; site visit and preparation of preliminary recommendations.

The Due Diligence Audit was completed by a site investigation; groundwater monitoring wells were drilled and samples collected to check the absence of contamination.

During all the phases of the project, Sogreah Magelis assisted the client in making key decisions to assess potential liabilities and minimize financial risks.
